

BT VERSATILITY BUSINESS TELEPHONE SYSTEM

The BT Versatility system comes with loads of useful features as standard (at least 50 different call handling features). Answer, hold and transfer calls with ease. Dial regular contacts or call other extensions by name. Personal voicemail for each extension with your own greeting. Have different features on each extension. Use Caller Display to see who's calling.

Feature Phones (pictured above) and standard telephones (including cordless phones) can be used.

Most features are also accessible from a standard telephone.

Never miss a call. Versatility voicemail can make sure that customers always get the attention and services they need, even when the offices are closed or people are busy. Calls can be answered by an 'Automated Attendant' which can route calls automatically, enabling callers to dial people direct. A great system for solicitors, estate agents, accountants, in fact - anyone!

The basic system can cater for 1-4 exchange lines and up to 8 extensions. Extra capacity for lines and/or extensions can easily be added by installing extra add-on modules. A battery backup unit can be fitted ensuring your business can still make and receive calls even during a power failure. Music on hold can be provided adding a professional feel to your business.

As you can see the Versatility system is an ideal choice for businesses of all sizes with a wealth of features at a very reasonable price. If you would like to discuss further, just call:-
